Courses taken through duly recognized MOOCs shall be used as supplementary courses

MOOCs integrate social networking, accessible online resources and are facilitated by leading practitioners in the field of study. Most significantly, MOOCs build on the engagement of learners who self-organize their participation according to learning goals, prior knowledge and skills, and common interests.

Courses in any one of the following formats may be offered:

4-10 weeks for shorter courses for 2 to 3 credits at certificate level or for teacher training programme.
12-16 weeks for CBCS programmes with faculty/mentor support from participating institutions/affiliations of 4-to 6 credits at diploma, UG and PG level. MOOCs are often taught by the same professors that teach online college classes. MOOC course materials are often exactly the same as the course materials provided to college students taking online classes. MOOCs are sometimes offered in partnership with colleges and universities.
